*2 DIMM: Supports one pair of modules inserted into the same color slots as one pair of Dual-channel memory configuration. Install the modules into **DDR4_A2, DDR4_B2** for better compatibility.

*When running XMP at **DDR4 3200 MHz or higher**, the system's stability depends on the CPU's capabilities.

*Memory modules listed as above is for reference only. Due to massive memory models in market, we can only verify some of them.

*When enabling Dual Channel mode with two or four memory modules, it is recommended that using the same capacity, brand, speed, and chips of

memory modules and also installed in the same color of DDR4 slots.
