Windows 7 Clean Install Step-by-step Guide

Windows Vista to Windows 7

Step 1 Preparation

1.1 If your computer does not come with a DVD or BD reading device, you will need to provide an external one to continue.

- 1.2 You can download the latest drivers for Windows 7 and save them in an USB flash disk. The drivers can be found on GIGABYTE product support page. Please go to <u>www.gigabyte.com.tw</u> for more information.
- 1.3 If you are not following the upgrade path for Windows 7, you will need a clean installation.

During the Windows 7 installation, your Hard Drive Disc will be formatted and all the data will be lost. Please **backup your data** before installation.

Step 2 Step-by-step installation

2.1 Insert the Windows 7 Installation Disc into the external DVD or BD reading device. Turn on your computer.

2.2 During the boot up screen, press [F12] on your keyboard to enter Boot Manager.

2.3 Once entered Boot Manager, choose the DVD or BD reading device where you insert the installation disc.

2.4 Press **any key** on your keyboard when you see the message to reboot from the DVD or BD reading device.

2.5 After rebooting, you will see the Windows 7 Installation page. Follow the instruction by your own reference.

2.6 Click "Install now" to continue.

2.7 Check "I accept the license terms" and click "next".

2.8 Since this is not a parallel upgrade (as stated in Step 1.3), you need to choose

"Custom" to continue.

2.9 Click "Drive Option".

2.13 In this picture, the **Disk 0 Partition 2** is a newly created partition. When we specified certain space during step 2.10, Windows will automatically assign 100MB to be reserved for system (and marked as **Partition 1**). Hence you will see the remaining space in Partition 2. You can repeat the partition creation for more partitions if you are using a Hard Drive Disc with fair large storage volume. When all partition process is done, choose your desired partition, and click "Next".

	Name	Total Size	Free Space	Type
9	Disk 0 Partition 1: System Reserved	100.0 MB	86.0 MB	System
3	Disk 0 Partition 2	99.9 GB	99.9 GB	Primary

3.4 Set up your "Windows Update" options. The default setting will be "Use recommended settings".

3.5 Set up your preferred time zone, time and date.

3.6 Once the Windows 7 desktop shows, your installation is complete. Welcome to Windows 7!
